

5 levels of AI adoption

How AI takes on more of the work around us and how the role of people changes.

01

Supplied context

You gather the information and provide it to AI.

02

Connected context

AI finds relevant information in approved sources.

03

Connected actions

AI can carry out tasks in approved tools.

04

Triggered workflows

A schedule or event starts an agreed workflow.

05

AI-native organization

People and AI work together.

You bring the context

 Meeting notes.pdf

 Customer email

Use these to prepare a follow-up for the customer.

Here is a draft based on the information you provided:

Hi,

Thank you for the conversation. It was great to discuss your priorities and the next steps for the project.

I will follow up with the details we discussed. Please let me know if there is anything else you would like to add.

Best,
Giovanni

Prepare a follow-up for the customer.

✓ Prepare the follow-up

 Read the meeting notes

 Checked previous customer emails

 Analyzed the tone and drafted the email

Here is a draft based on your meeting and the customer's email:

Hi,

Thank you for the conversation. It was great to discuss your priorities and the next steps for the project.

I will follow up with the details we discussed. Please let me know if there is anything else you would like to add.

Best,

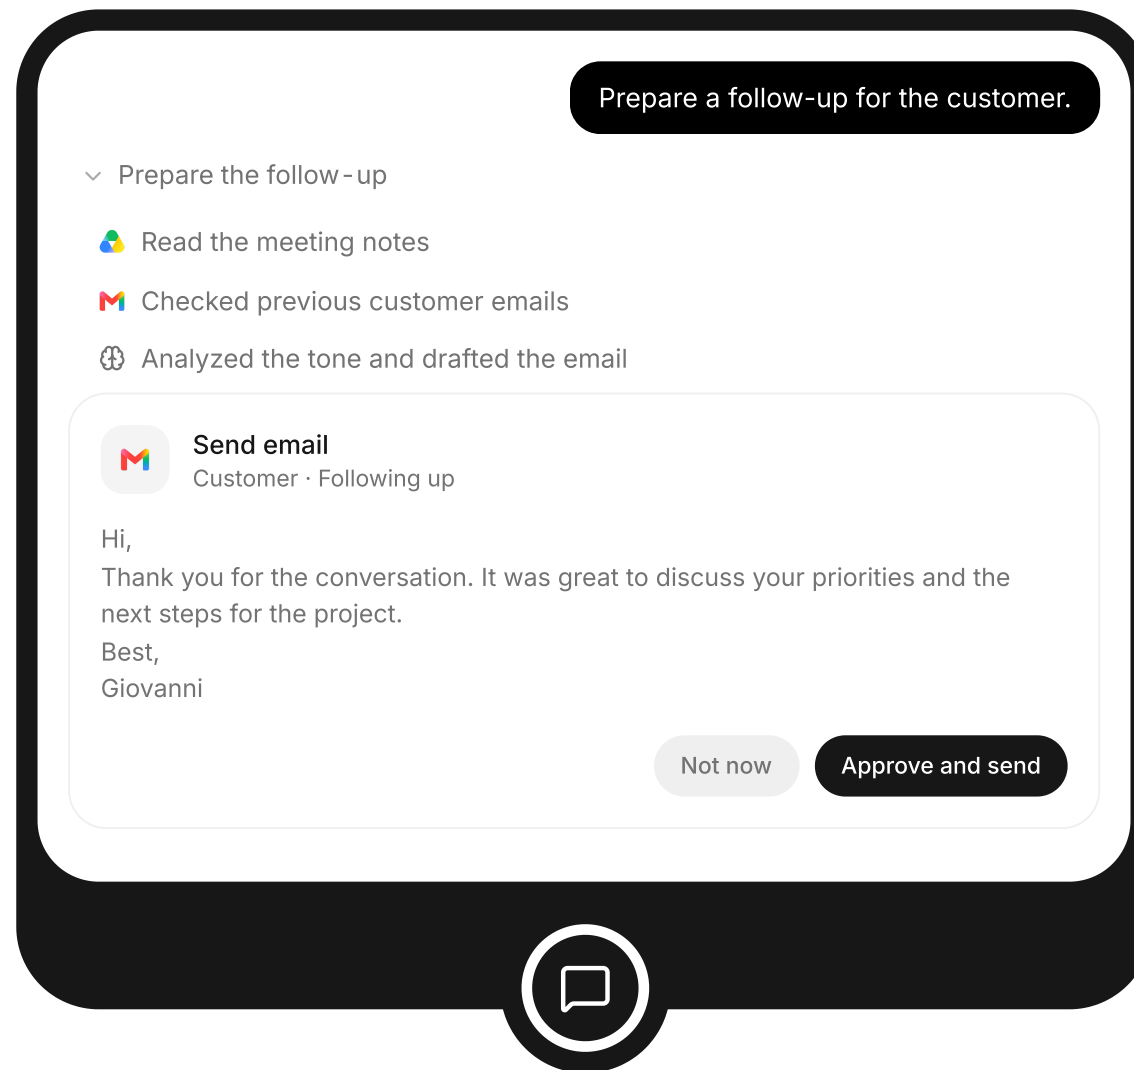

Giovanni

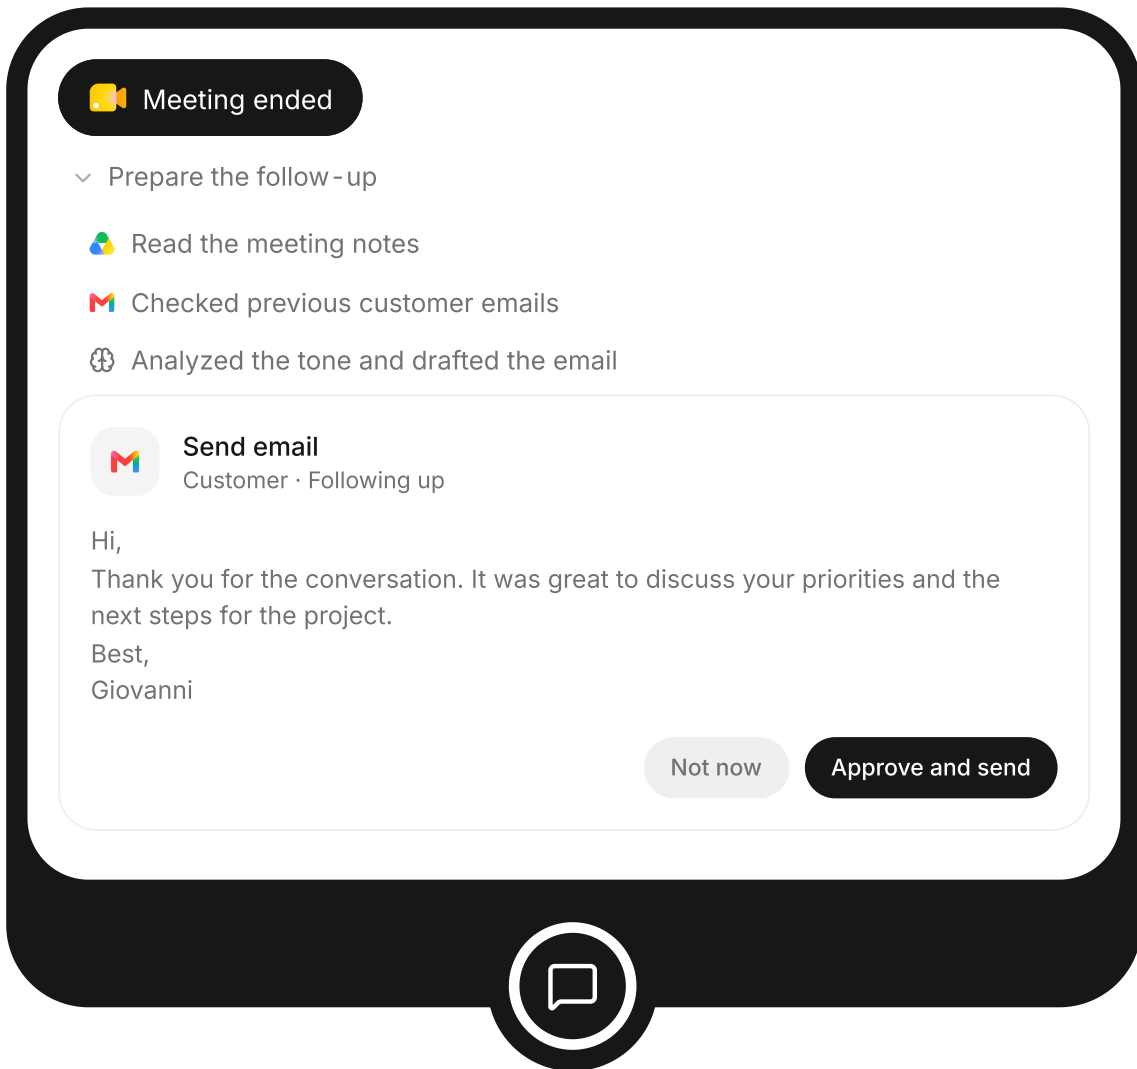

AI finds the context

AI takes the action

AI starts the workflow

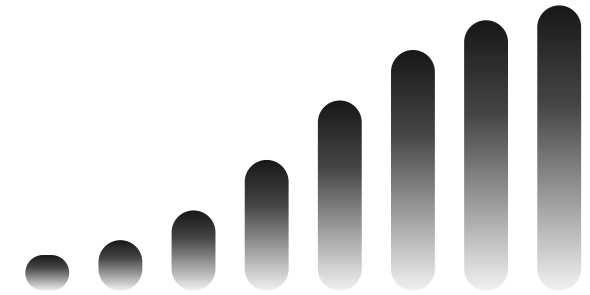

An AI native organization

Design processes for AI to take on work

- Digitize and restructure internal processes.
- Define standard operating procedures, including outcomes, rules and when to escalate.

Make company knowledge accessible to AI

Organize and digitize company knowledge so people and AI can access it.

Safeguards and observability
